

Fassmer
Engineering your safety and comfort

Experts for maritime and offshore solutions

Holger Faßmer

Harald Faßmer

Fassmer is a dynamic company with an expert in-house design and engineering team and state-of-the-art production facilities. Five generations of family ownership stand for time-tested experience and expertise in shipbuilding, deck equipment and many other maritime as well as offshore technology solutions. Top quality and customer satisfaction are Fassmer's hallmarks.

With a passion for engineering and innovation, reliability and safety, Fassmer consistently strives to make life and work at sea as safe and efficient as possible. Fassmer's boarding systems, yacht equipment, gangways and working equipment, systems for offshore installations, and davits are built exactly for this purpose.

Customers can trust Fassmer's extensive experience with sea-resistant materials and exceptional engineering design expertise to provide them with tailor-made solutions, also for highly special applications. After delivery, Fassmer will perform on-board installations, if desired.

Fassmer Boarding Systems for Commercial Ships, Cruise and Navy Vessels

Fassmer Boarding Systems for commercial ships are based on a modular concept with standard elements to meet any size or design specification, while minimizing overall dimensions and weight. Our Boarding Systems for cruise ships are specifically designed to make coming on board a comfortable as well as an aesthetic experience. For naval applications, our boarding systems can be stowed inside the ship's structure. This allows the ship to be completely closed to avoid radar detection.

Fassmer Design, Production and Service

Through close cooperation with research institutes and synergies from our five product divisions – Shipbuilding, Lifeboats, Deck Equipment, Wind Power and Composite Technology – our in-house design and engineering teams achieve customized solutions that meet the most challenging demands in terms of reliability, functionality, efficiency and choice of materials. Our state-of-the-art production facilities, wide range of techniques and experienced staff assure the superior quality of our products and allow flexible manufacturing that ranges from prototypes to large-scale series.

Needless to say, Fassmer is equally committed to providing customers with expert after-sales support. 200 authorized service engineers in 40 countries are available around the clock to ensure the safe and reliable operation of our products. In addition to inspections, regular maintenance, repairs, spare parts supply and refits, Fassmer specifically offers a:

- **No-worry package**
including project management, installation, commissioning and testing
- **Safety management system**
ensuring that all periodic servicing and maintenance are done according to international regulations and requirements
- **Central service hotline**
On + 49 (0) 1805 03 5485 callers will either receive direct answers to technical questions or be referred to the right person
